We propose the development of an interactive platform, for peer education that aims to revolutionize the sharing of knowledge and the enchantment of skills. This platform will act as center bringing together individuals, and areas of expertise who can teach and learn each together. Platform users have opportunities to share and exchange their knowledge, notes, etc. with their peers and community. Our aim for this project is enable to high level content creation and interactive discussions with useful interfaces. In conclusion, by leveraging peer educations potential we aim to establish an inclusive environment where individuals can expand their horizons share their expertise and foster collaborative learning in the era.
